

CIS 212 WEEK 6 WARM UP

1. Launch Dreamweaver.
2. If you are on campus, import your site definition.
3. Create a new folder named *week6* in the *212practice* folder. Create 4 new pages within the folder. (page1.html, page2.html, page3.html, page4.html)
4. Type or paste some text on each page. (no formatting)
5. Create some headings on the pages. (Use the Format pull-down in the property inspector.)
6. Add links to page1.html, page2.html, page3.html, and page4.html on each page. You can create them on page1.html and then copy & paste to the other pages.
7. Open page1.html and use **Page Properties** button in Property Inspector to set font, background, heading, and link properties.
8. Use the CSS Panel to edit the *a:hover* rule. Add a background color.
9. **Move CSS Rules** to an external style sheet (*week6styles.css*). To do this, select the rules in the CSS Panel and right click to Move CSS Rules to a new external style sheet.
10. Link all 4 pages to *week6styles.css*.
11. Use F12 to preview your work.
12. Open *212portfolio.html* and add a link to the *week6* folder.
13. Upload your work and test it on the server (<http://studentweb.gcccd.net/user.name/212practice/week6>)
